INSURANCE PRENATAL LETTER

Dear Patient,

This office participates in many different health care programs. Each PPO, HMO, and health care plans are different and can have many different sub-plans or groups. Most insurance companies include the prenatal visits and delivery in a global billing. However, lab work, ultrasounds, NSTs, and other additional tests during your pregnancy may not be included under the global billing. If your insurance company determines that you have a portion that is your responsibility, we will bill you upon notification from your insurance company.

Thank you,
